

List of Validated Payment Applications

As of May 31, 2008

The following List of Validated Payment Applications have been assessed for compliance with the Payment Application Best Practices (“PABP”). Only those versions of the application identified in the listing below have been evaluated and determined to comply with PABP. Compliance with the PABP is determined based upon data and information developed by an evaluation of the application by a Qualified Payment Application Security Company (“QPASC”). Although Visa reviews the QPASC-developed data and information, Visa does not independently confirm such data or information nor does Visa perform any tests or analysis of the functionality, performance or suitability of any of the applications and/or products listed. Visa makes no endorsement or recommendation of applications or products, or of their respective developers or distributors. Furthermore, Visa makes no warranties, guarantees or representations that any of the applications or products will meet your requirements for performance or functionality, that the applications or products will be free from errors or malicious code, or that the applications or products will be compatible with any other systems or applications. Any and all representations or warranties, including any and all representations and warranties made by the payment application vendor, are disclaimed by Visa.

The information provided herein is provided “AS IS” with no warranties, expressed or implied, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose and/or non-infringement. The information provided herein is subject to change by Visa, with or without notice. Although Visa makes good faith efforts to provide accurate and complete information, merchants, or anyone else utilizing the information set forth on the following List of Validated Payment Applications remain responsible for confirming the accuracy of the information set forth below, including but not limited to, confirming with the appropriate payment application vendor that the version of the application identified below is in compliance with PABP. Use of any one or more of the applications below (i) does not guarantee or ensure compliance with the PCI DSS; and (ii) does not satisfy any Acquirers’ obligation to perform their own evaluation and due diligence, to ensure the PCI DSS compliance of their merchants and agents.

PABP reviews are valid for one year, with annual attestation due to Visa one year from the below “VALIDATION DATE”. Attestations that are from 1-60 days late are noted in **yellow** and reports that are from 60-90 days late are noted in **red**. Entities with reports over 90 days past due will be removed from this list.

- (1) An annual validation is required for those payment applications with major upgrade or product version changes. If there are no changes to the product, Visa will require a letter signed by an Officer of the software company indicating no changes to the payment application and continued adherence to the Payment Application Best Practices. Visa will note that there were no changes to the product
