

It Just Works!

The POS System that gets the job done

onePOS Restaurant Solution

onePOS is a truly different Point-Of-Sale system that you will love. It is amazingly easy to use, something you can depend on every day, and with 20 years of innovation has the features you need.

A solution that can keep up with your fast paced, highly demanding, and ever changing market. A system that can provide you with the right tools to operate and manage your business, without interfering with what is most important - the ability to consistently delight your guests, day after day, night after night.

Our systems are engineered to be easy to use, intuitive, and efficient for both your newest hires and your most seasoned veterans, whether you run a full service or counter service restaurant, a bar or nightclub, or hotel or resort. We constantly evolve our software to offer you cutting edge features - when you need them - keeping you ahead of the competition. And to ensure nonstop system availability, we engineer reliability into all aspects of our system so you can

focus on your operations and not your point-of-sale.

onePOS provides entire turn-key solutions for a variety of restaurants. Leveraging our knowledge of the restaurant industry and our ability to adapt industry standard solutions to it, we are able to develop reliable and open solutions while maintaining an affordable total cost of ownership.

onePOS EMV / Pay at Table

onePOS supports a variety of processors and hardware for processing EMV transactions on traditional workstations or pay at table. These interfaces all support full Tokenization and End to End encryption, removing the majority of risk for data breaches and credit card compromises from your operations. Utilizing the Transafe gateway we are always on the leading edge of capability and features for safe, secure EMV credit card processing.

Quick Service and Take Out

Coffee shops, delis, take-away kiosks, drive-thrus, even gift shops can be easily handled by the onePOS Solution. Conversational ordering and payment keep the line flowing regardless of the demands of the guest.

Bars and Night Clubs

onePOS' finely-tuned operation and built in security give bar and night club operators new levels of control. Super fast order entry and check close / payments, coupled with pre-paid bar tabs and accurate liquor pricing will make your bar locations excel.

Billiards Parlors

onePOS first developed POS for Billiards Parlors, and includes those features today as an integral part of the complete system. Quickly start timed tables for your guests, sell them drinks and food, and close out the check with the same speed and grace of any other onePOS transaction.

Hotels and Resorts

With built in guest lookup and room charges to most major hotel PMS systems onePOS provides an easy to use, super stable POS that meets the wide range of needs of hotel and resort properties.

Full Service and Casual Dining

onePOS has the flexibility and features to easily handle table service - from casual dining to fine dining, or anywhere you fit in between. And unique to onePOS, each dining room can be configured individually to give even greater control at your locations.

Enterprise Management

Leveraging the Internet and its related technologies, onePOS' oneMetrix Hybrid Cloud automatically syncs the data for each of your locations with our cloud servers allowing enterprise access to information anywhere, anytime. Grow from a single store to an entire enterprise all using the same POS and the same cloud solution.
